ERROR: YOU NEED A THIRD AUTHOR TO SET THE FOURTH ONE!

Abgabe am: 6. Mai 2016

Aufgabe 3.1

This is a test file with some sections in it. Every section contains the sheetnumber as first number. Use \setsectionstyleplain{}.

Aufgabe 3.1.1   One of our subsections

This is an example subsection.

a)

There are also subsubsections ;)

Aufgabe 3.2   How the dates work

The command \setstartdate{YEAR}{MONTH}{DAY} sets the start date, but this is not the first release date. The first release Date is the date one interval later.
The interval \setdatefreq{DAYS} defines the frequency of the releases. This is used for the date calculation.
If there're some release interrupts (e.g. due to hollydays), the \setinterruptions{AMOUNT} is your friend.
